Linen / **Baby Blue**

Our **Baby Blue** linen cover has a natural compact weave of thread helping to keep the cover contemporary.

Our **Embossing Technique** is a traditional process using a brass metal plate and individual lettering blocks, arranged by hand for each and every order. Pressed into the linen, you can choose from our fantastic foil options including rose gold, black, white, gold or silver to complete your look.

The typeface for our embossing process is Optima with the ability to have two lines of text. Line number one is a font size of 36pt with space for up to 20 characters. Line number 2 is a font size of 24pt and can have up to 22 characters.

The **UV Printing Technique** offers more flexibility for your cover personalisation compared to the traditional embossing.

With a computer generated black print, you can create a full front cover design using black and white jpegs, text, logos or line art creations. If you reduce your black percentage in your lin art file, your UV print will be on a grayscale with a softer contrast.

Linen / **Textured Sage**

Our **Textured Sage** linen cover has a natural compact weave of thread helping to keep the cover contemporary.

Our **Embossing Technique** is a traditional process using a brass metal plate and individual lettering blocks, arranged by hand for each and every order. Pressed into the linen, you can choose from our fantastic foil options including rose gold, black, white, gold or silver to complete your look.

The typeface for our embossing process is Optima with the ability to have two lines of text. Line number one is a font size of 36pt with space for up to 20 characters. Line number 2 is a font size of 24pt and can have up to 22 characters.

The **UV Printing Technique** offers more flexibility for your cover personalisation compared to the traditional embossing.

With a computer generated black print, you can create a full front cover design using black and white jpegs, text, logos or line art creations. If you reduce your black percentage in your lin art file, your UV print will be on a grayscale with a softer contrast.

Linen / Wine

Our **Wine** linen cover has a natural compact weave of thread helping to keep the cover contemporary.

Our **Embossing Technique** is a traditional process using a brass metal plate and individual lettering blocks, arranged by hand for each and every order. Pressed into the linen, you can choose from our fantastic foil options including rose gold, black, white, gold or silver to complete your look.

The typeface for our embossing process is Optima with the ability to have two lines of text. Line number one is a font size of 36pt with space for up to 20 characters. Line number 2 is a font size of 24pt and can have up to 22 characters.

Our **Laser Etched Technique** is a burning process which will also give you full flexibility with your logo or line art design which will be lasered directly onto the linen.

The result of this process is a matte bronze effect to give a striking contrast against our darker linen ranges.
